

Finance - Inventory Statistics

The **Inventory Statistics** tab provides a comprehensive summary of item quantities, values, and storage volumes across multiple warehouses and timeframes. This module is crucial for inventory control, financial auditing, and operational planning. The tab is divided into three key sections: **Items**, **Items and Owner**, and **Item (Monthly)**.

To access the **Inventory Statistics** tab:

1. Go to your **ERP Dashboard**.
2. Click on **Inventory Management** in the main menu.
3. Select **Inventory Statistics** from the dropdown options.
4. Choose the desired sub-tab:
 - **Items**
 - **Items and Owner**
 - **Item (Monthly)**

Items Items & Owner Items(Monthly)

The **Items** tab provides a snapshot of inventory metrics by item, without breaking it down by ownership.

Key Fields:

- **Item No.** – Unique item identifier.
- **Description** – Short product description.
- **Category** – Product category (e.g., Electronics, Apparel).
- **Land Cost** – Unit cost of the item landed (inclusive of taxes/shipping).
- **Cumulative Qty** – Total accumulated stock quantity.
- **Cumulative Value** – Total value of the accumulated quantity.
- **Total Volume (m³)** – Physical volume occupied in cubic meters.

Searching and Filtering Options:

- **Language** – English / Chinese
- **Query Date** – Specify a date to fetch relevant inventory data.
- **Number (From/To)** – Filter by item numbers or quantity/value ranges.

- **Corps** – Filter by corporate division or company entity.
- **Warehouse** – Filter by warehouse location.
- **Category** – Narrow down by product category.
- **Export** – Export the data to an **Excel file**.

The **Items and Owner** tab includes the same metrics as the Items tab but adds visibility into which owner each item belongs to — useful for businesses managing stock on behalf of third parties or different departments.

Key Fields:

- **Owner** – The entity or party that owns the item.
- **Item No.**
- **Description**
- **Category**
- **Land Cost**
- **Cumulative Qty**
- **Cumulative Value**
- **Total Volume (m³)**

Searching and Filtering Options:

- **Language** – English / Chinese
- **Query Date**
- **Number (From/To)**
- **Corps**
- **Warehouse**

- **Category**
- **Search by Owner** – Input a specific owner to filter.
- **Export** – Export the filtered data as an **Excel file**.

The **Item (Monthly)** tab presents inventory data on a month-by-month basis. This view helps track trends and seasonality in inventory levels, value, and storage space.

Key Fields (per month):

- **Product** – Name or ID of the item.
- **Land Cost** – Unit cost of the item.
- **[Month] Cumulative Qty** – Total quantity held by the end of the month.
- **[Month] Cumulative Value** – Total value of the item for that month.
- **[Month] Total Volume (m³)** – Storage space taken in that month.

Example:

- **Jan Cumulative Qty, Jan Cumulative Value, Jan Total Volume (m³)**
- **Feb Cumulative Qty, Feb Cumulative Value, Feb Total Volume (m³)**
- *(and so on for each month)*

Searching and Filtering Options:

- **Language** – English / Chinese
- **Query Date**
- **Number (From/To)**
- **Corps**

- **Warehouse**
- **Category**
- **Export** – Export the monthly data into an **Excel file**.

The **Inventory Statistics** tab in your ERP system equips teams with critical inventory data to support stock management, financial forecasting, and warehouse efficiency. Use the **search and filtering tools** to tailor your view and export relevant data as needed.

For further assistance or advanced reporting needs, please contact your ERP administrator or refer to the full system user guide.
