

Finance - Warehouse Operation Statistics

Overview

The **Warehouse Operation Statistics** tab provides a consolidated view of warehouse performance across different order companies. This includes inbound and outbound activity, order volumes, and associated financials. It enables operations, warehouse managers, and finance teams to monitor logistics efficiency, track fulfillment, and make data-driven decisions.

Navigation

To access the **Warehouse Operation Statistics** tab:

1. Log in to your **ERP System**.
2. Navigate to the **Finance Module**.
3. Click on **Warehouse Operation Statistics**.

Key Metrics Tracked

This tab displays essential performance indicators for each **order company** and their related warehouse activities.
