

Purchase - Loading Arrivals

The **Loading Arrivals** tab is designed to give your logistics, warehouse, and supply chain teams a detailed view of incoming shipments. It consolidates container-level and order-level information so you can monitor arrival statuses, estimated timelines, shipment volumes, and trade details—all in one place.

Navigation

To access the **Loading Arrivals** tab:

1. **Log in to your ERP System.**
2. **Navigate to the Logistics or Shipping Module.**
3. **Click on Loading Arrivals in the navigation menu.**

Core Fields in Loading Arrivals

The tab provides a comprehensive view of all shipments that are en route or have recently arrived at their destination.

System No.	Trace	Status	Payment Status	Fee Set Status	Receive Abnormal	Updated LC	Type	Destination	Qty Info	Total Weight	Total Volume
CQ20250328046001		Arrived	Unpaid	Confirmed	N	N	Overseas	BALBOA,PANA MA	PCSx3,306	466.415lb	16.622ft³
CQ20250326046001		Arrived	Unpaid	Confirmed	N	Y	Overseas	New York	PCSx4,947 CSx3	146.47lb	174.904ft³

Shipment Overview:

- **System No.** – Unique identifier for the arrival record.
- **Trace** – Track the shipment's progress and status updates.
- **Status** – Current status (e.g., In Transit, Arrived, Delayed).
- **Payment Status** – Indicates whether associated costs have been settled.
- **Fee Set Status** – Shows whether logistics-related fees (e.g., freight, duties) are configured.
- **Receive Abnormal** – Flags any abnormal receipt conditions.
- **Updated LC** – Indicates if Letter of Credit details were updated.
- **Type** – Shipment type (e.g., Transfer, Booking, Online Return).

Destination & Shipment Details:

- **Destination** – Final delivery point or warehouse.
- **Qty Info** – Quantity of goods in this shipment.

- **Total Weight** – Combined weight of the shipment.
- **Total Volume** – Total volume occupied (in m³ or other units).

Target & Trade Details:

- **Target Corp** – Receiving corporate entity.
- **Target WH** – Warehouse assigned for receiving.
- **Trade Type** – E-Commerce, Normal, Exclusive, etc.

Reference & Tracking Details:

- **Loading Order No.** – Reference to the original loading order.
- **Container No.** – ID of the shipping container.
- **Exclusive Order** – Internal or project-specific order reference.
- **Transfer No.** – Number tied to internal transfers.
- **TT (Days)** – Transit time in days.

Timeline Milestones:

- **Expected Loading Date** – Date the shipment was expected to be loaded.
- **ETD (Estimated Time of Departure)** – When the shipment left its origin.
- **ETA (Estimated Time of Arrival)** – Expected date of arrival at the destination.
- **Arrived Date** – Actual date the shipment arrived.

Administrative Info:

- **Created by** – User who created the entry.
- **Source Company** – The company or entity shipping the goods.

- **Remarks** – Notes, issues, or observations added by users.

Users can perform the following actions directly from the **Loading Arrivals** tab:

- Arrived
- Set Fees
- Change Contain Info
- Set Fee Status To
- View Fee
- Print Loading Order (PDF)
- Export Loading Order (Excel)
- Refresh

Searching and Filtering Options

The screenshot displays the 'Loading Arrivals' tab in the BIZ system. The search bar is highlighted with a red box, showing filters for 'No./Loading No./Container No.', 'Search by Product No.', 'Search by PO', and 'Search by Destination'. The table below lists two shipments:

Carrier No.	Exclusive Order	Transfer NO.	TT(Days)	Expected Loading Date	ETD	ETA	Arrived Date	Created by	Source Company	Remarks
J9311389	AIR 10011		13	03/28/2025 00:00	02/18/2025 00:00	03/03/2025 00:00	03/29/2025	蒋杉琪	AIR Business Solutions LLC	
			4	03/26/2025 00:00	03/26/2025 00:00	03/30/2025 00:00	04/10/2025	蒋焱超	AIR Business Solutions LLC	

The page shows 1 - 2 of 2 items.

To streamline your workflow, use these filters to locate shipments:

- **Number / Loading Number / Container Number** – Search using any of these shipment identifiers.
- **Search by Product Number** – Filter records by product SKU.
- **Precise** – Enable exact-match filtering for specific queries.
- **Search by PO** – Filter by related Purchase Order number.
- **Search by Destination** – Narrow results to specific delivery locations.

For a detailed walkthrough, please refer to the video guide.

The **Loading Arrivals** tab is your go-to dashboard for real-time shipment tracking and post-shipping updates. With transparent data on timelines, quantities, destination warehousing, and trade conditions, this tool helps minimize disruptions and improve inbound planning. Use the filtering tools to quickly find, assess, and manage your incoming logistics.
